

ANDREW KUCZYNSKI

WEB & MOBILE APPLICATIONS DEVELOPER

kuczynskiandrew@gmail.com / 954-610-2584

Product- and UX-focused software engineer pursuing opportunities for greater autonomy and meaningful product contributions

EXPERIENCE

SOFTWARE ENGINEER II

Oct 2022–Present

Constant Contact

- Contributed to the development of an AI-powered marketing platform that helps small businesses improve their online presence and run effective social campaigns
- Developed and improved an automation builder that enabled 75k users to create more than 190k workflows and send over 1M emails each month
- Led an application migration from a dated legacy Webpack build system to a modernized front-end toolchain with Vite, TypeScript, React, and pnpm
- Contributed to targeted product growth experiments using A/B-style testing to improve conversions and encourage users to add contacts and send email campaigns
- Maintained and improved the email delivery platform, using Amazon SQS to batch messages and increase sending throughput

FULL STACK SOFTWARE ENGINEER

Mar 2019–Sep 2022

University of Florida

- Built and maintained sub-applications for ONE.UF: the student and faculty web portal used by over 100,000 unique users yearly
- Aided in transitioning and redesigning existing web applications from AngularJS to React, as well as designing and creating new applications
- Set up backend and middleware for new applications with Express and SQL for deployment on Node servers
- Participated in UX and design sessions and customer meetings to help improve site-wide user experience
- Participated in agile development with sprint ceremonies, including code contributions, code reviews, and story planning

EDUCATION

Master of Science
